

VISIONFUSION AI: MULTIMODAL INSIGHT

Presented By:

E. Sai Srija- AP23I00I0483

M. Reshma Chowdary - AP23I00I0503

INTRODUCTION

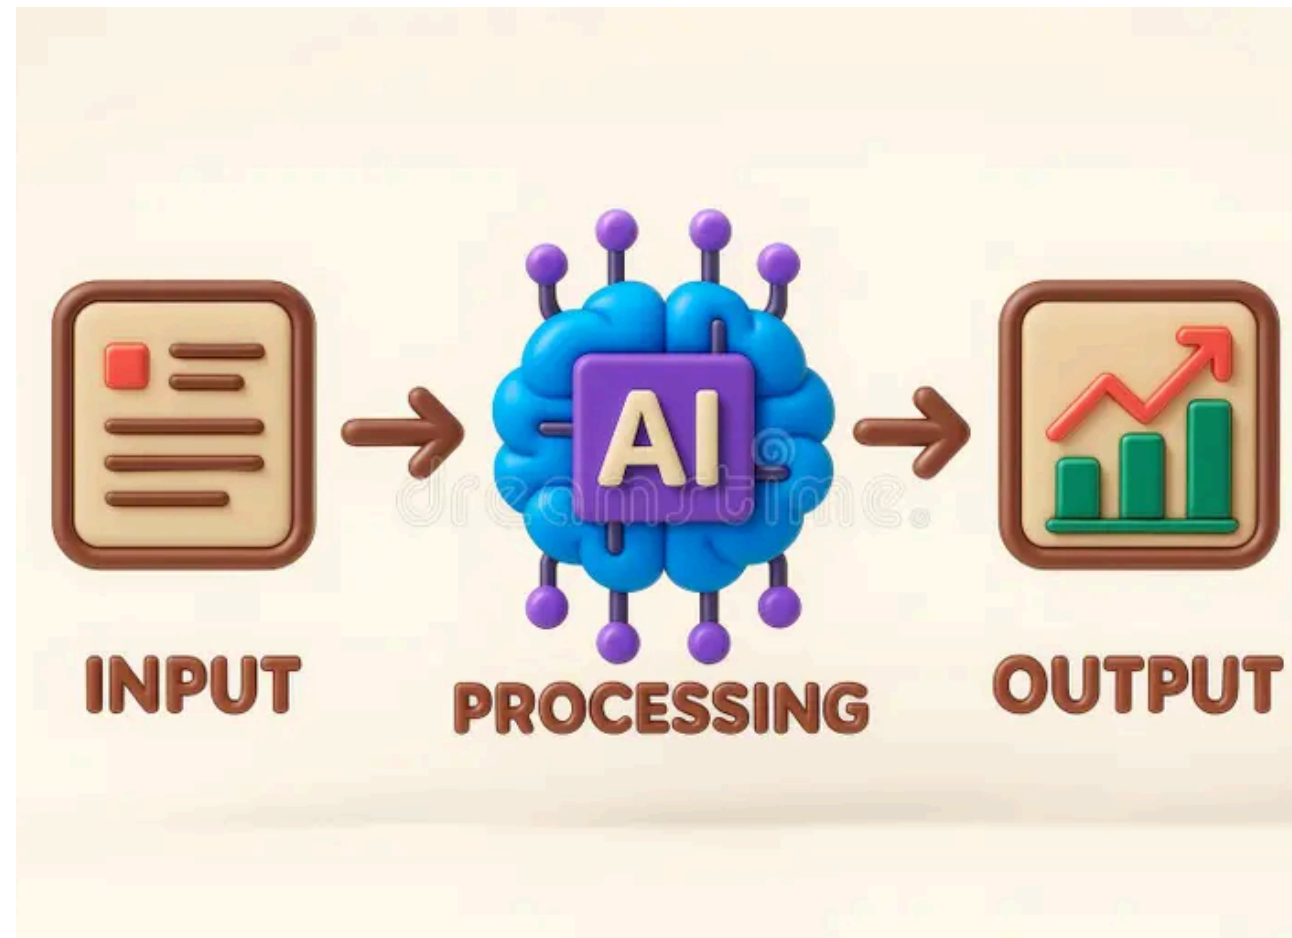

- VisionFusion AI is a multimodal system
- Combines image understanding + text reasoning
- Helps generate intelligent insights
- Useful in real-world applications like retail & healthcare

PROBLEM STATEMENT

- Traditional systems process only text OR images
- Lack of combined understanding
- Difficult to generate meaningful insights from both
- Need for intelligent multimodal solutions

OBJECTIVE

Build a system that:

Accepts image + text input

Extracts image features

Combines with user prompt

Generates insights or recommendations

TECHNOLOGY USED

- Python
- FastAPI
- CLIP Model
- Transformers
- Pillow (Image processing)

SYSTEM ARCHITECTURE

- User uploads image + prompt
- Image → Feature Extraction (CLIP)
- Features + Text → Processing
- Output → Insight / Recommendation

WORKING PROCESS

1. Upload image
2. Enter text prompt
3. Extract image features
4. Combine with text
5. Generate result

APPLICATIONS

- Retail: Product recommendation
- Healthcare: Image-based analysis
- Content analysis
- AI assistants

ADVANTAGES & DISADVANTAGES

ADVANTAGES

- Combines multiple data types
- Improves decision making
- Scalable system
- Easy to integrate

DISADVANTAGES

High computational cost
Large model size
Depends on input quality
Slower processing
Limited understanding

LIMITATIONS

Requires high memory usage

Needs powerful GPU for better performance

High latency for large inputs

Difficult to debug model errors

Limited domain-specific knowledge

Sensitive to noisy or irrelevant data

Training data bias affects results

FUTURE ENHANCEMENTS

- Integrate real LLM (ChatGPT/Gemini)
- Add frontend UI
- Deploy to cloud
- Improve accuracy

CONCLUSION

- VisionFusion AI enables multimodal intelligence
- Combines image + text effectively
- Useful in many real-world domains
- Future scope is very high

The background features a light gray field with abstract teal geometric elements. In the top-left and bottom-left corners, there are teal triangles and overlapping rectangular outlines. In the top-right and bottom-right corners, there are teal triangles and a grid of small teal circles. A diagonal teal line runs from the top-right towards the bottom-left.

THANK YOU
